LAURENS KRIKILION

ABOUT ME

C++ software engineer with over three years of professional experience developing and optimizing large scale, performance critical software. I specialize in low-level programming, engine and systems development, and writing efficient, maintainable code.

WORK EXPERIENCE

2023

Climax Studios Ltd. Keywords Studios

Full-Time Feb 2023 - Present | +3 years

Climax Studios is a studio that works with the world's top developers on the headline games. I've worked here with many well known clients such as Microsoft and Sony.

PROJECTS

Sep 24 - Current

Unannounced Microsoft Project

This is a AAA project for all next-gen consoles, where im working as senor programmer

Sep 23 - Nov 2025

Microsoft Flight Simulator

Contributed to porting a large Windows codebase to a Linux based platform, requiring substantial adaptation of platform-specific systems and optimization for console hardware. Worked on low-level engine improvements and performance optimization to meet strict platform requirements.

Feb - Aug 2023

Age Of Empires IV

Worked within the platform optimization team to improve runtime performance and hardware utilization on Xbox platforms. Contributed to low-level optimizations and platform-specific improvements while collaborating with engineers across multiple disciplines.

ACHIEVEMENTS

- 3+ years of professional C++ development experience
- Contributed to multiple large-scale commercial software releases
- Experience working in large multidisciplinary engineering teams
- Specialized in performance optimization and systems programming

CONTACTS

Phone: +32 468 32 02 49

Email: laurens.krikilion@outlook.com

Website: https://slowlor1ss.github.io/KrikilionLaurens.github.io/

EDUCATION

Howest - Digital Arts and Entertainment
Bachelor's degree, Game development
2020 - 2023

Viso Mariakerke
High School degree, Graphic & web design
2017 - 2020

GO Atheneum Brakel
Electromechanical Engineering
2014 - 2017

SKILLS

Languages:

C++, C, C#, Python, Lua

Systems Programming:

Performance optimization
Low-level programming
Memory management
Debugging & profiling
Multithreading
Engine architecture
Cross-platform development

Development:

Large C++ codebases
Software architecture
Code reviews
Version control
Continuous integration-workflows
Technical debugging
Performance analysis

Platforms:

Windows, Linux, PlayStation 5, PlayStation 4, Xbox, PC

Tools:

Git, Perforce, Visual Studio, Rider, Superluminal, PIX, Razor, Beyond Compare
